

HarneckerCarey Launches HCPharma

In order to give its clients in the life sciences industry a better quality of service, Carey y Cia. and HarneckerCarey are launching HCPharma. This new strategic tool will efficiently aid in finding all the resolutions, court decisions and information circulars, issued by the Public Health Ministry in Chile, in a friendly and easy way.

HCPharma is mainly oriented to facilitate the daily work of a company's local Technical Director and Regulatory team, allowing them to access relevant information for their decision making process in sanitary matters.

For the moment, due to the nature of the information, this service is just available in Spanish. To know more about this instrument please access www.hcpharma.cl
